

PROJECT PLANNING LOGIC

Project: Import Data using Transform Maps

Team ID: 6ab615fddcdae33acb38af6f

Planning Approach

The project is planned using **Epics**, **User Stories**, **Story Points** and **Sprints**, following the planning format given in the reference document. Each task below has been adapted to the *Import Data using Transform Maps* project. Work is grouped into four epics (Data Import, Data Transformation, Data Validation, and Deployment & Verification) and delivered across two sprints.

Story Point Scale

Story Point	Effort Level
1	Very Easy task
2	Normal task
3	Moderate task
5	Difficult task

Sprint 1 — Data Import & Transformation

Goal: Prepare the source data, load it into an import set, and build the transform map that moves it into the target table.

Epic	User Story / Task	Points
Data Import (Epic 1)	Preparing Source Data (USN1)	2
	Creating Import Set (USN2)	2
	Loading Source Data (USN3)	1
Data Transformation (Epic 2)	Creating Transform Map (USN4)	3
	Mapping Source and Target Fields (USN5)	3
	Configuring Coalesce / Duplicate Handling (USN6)	3
	Total Story Points in Sprint 1 (2 + 2 + 1 + 3 + 3 + 3)	14

Sprint 2 — Validation, Deployment & Verification

Goal: Validate the imported data, run the transform, and verify the results in the target table, including error handling.

Epic	User Story / Task	Points
Data Validation (Epic 3)	Validating Imported Records (USN7)	2
	Handling Missing / Invalid Data (USN8)	3
	Testing Reference Fields (USN9)	3
Deployment & Verification (Epic 4)	Running Transform (USN10)	3
	Verifying Target Records (USN11)	2
	Error Handling and Final Testing (USN12)	3
Total Story Points in Sprint 2 (2 + 3 + 3 + 3 + 2 + 3)		16

Total Story Points & Velocity

Measure	Value
Sprint 1	14 Story Points
Sprint 2	16 Story Points
Total Story Points	14 + 16 = 30
Number of Sprints	2
Velocity	30 / 2 = 15 Story Points per Sprint

Conclusion: The *Import Data using Transform Maps* project is divided into two sprints covering data import, transformation, validation, deployment and verification. The planned team velocity is **15 Story Points per Sprint**.
